

# Creating High Performance Schools

By combining real-time sensing and continuous analysis of indoor environments Aircuity has helped building owners:

- Lower operating costs
- Improve safety
- Become more energy efficient

Aircuity's solutions have benefitted:

- Bloomfield Public Schools
- CT River Academy, East Hartford
- Glastonbury Public Schools
- New Haven Public Schools
- Plainville Public Schools
- Waterford Public Schools

- Reduce annual energy costs by varying a facility's ventilation based on demand
- Significant savings can be used to reduce a school's budget
- Reduce costs by downsizing the HVAC system based on Aircuity's ability to assist Building Automation to direct ventilation where and when it is needed
- Aircuity solutions play a significant role in qualifying school buildings for LEED® certification
- Aircuity Advisor™ services provide insight and intelligence by providing visual reports and actionable information to quickly highlight areas that may need attention by facility managers
