

## **SITEBILT**<sup>®</sup>

### **WHAT IS SITEBILT<sup>®</sup>?**

- Factory Engineered and Fabricated – Field Assembled AHUs
- Product offering for the last 40 years
- Benefits of Factory Engineered Product Combined with Contractor Built Unit

### **HOW DOES SITEBILT<sup>®</sup> WORK?**

- Engineered and manufactured just like factory assembled units using the same high quality components
- Air Enterprises monitors every aspects of the project; including design, fabrication, crating and installation
- All fan assemblies and other critical components are factory tested
- Components are packaged specific to the project in the order they will be assembled
- Final assembly is performed under the direction of OEM factory authorized assembly advisors
- Full field performance testing available

### **BENEFITS OF SITEBILT<sup>®</sup>**

- Architectural prominence or integrity of existing building structure is maintained while accommodating new AHU
- “Inaccessible” spaces can be used since parts can be rigged via elevators, hallways, doorways, etc. for assembly in place
- Optimize available mechanical space by incorporating existing columns, beams and wind bracing into the unit design
- Allows installation of over-height equipment to maximize room heights; reducing freight costs.
- Minimize disruption, downtime and requires little or no building modification
- 40 Year Non-Corrosion Guarantee
- Unit can be constructed with up to 80% (by Weight) Post-Consumer Recycled Materials
